Understanding Projects and Permits

A **“Project”** consists of one or more **“Permits.”** The number and type of individual permits required per project is determined based upon the different trades and contractors involved in the project. For example, an Interior Alterations project might consist of four permits: building, electrical, HVAC, and plumbing.

“Building Permit Revenue Total” includes total fees collected for all **“Permits Issued”** this month, plus any application fees paid for new project submittal, and any miscellaneous building permit fees collected on existing permits, i.e. re-inspection fees, permit extension fees, etc.

“Projects Started” is the number of new projects which have been **submitted** to the Village for permits during this month; these projects are in the process of review and their corresponding permits might not be issued until a future month. Permit fees for Projects Started will be reflected during the month of those permits' issue.
