Village of Long Grove Illinois

November 18, 2016

Dear Long Grove Residents,

The Village of Long Grove has made application for Federal Funding that would pay for 80% of the cost to reconstruct North Krueger Road in 2018. The Village is pursuing Federal Funding in an effort to maximize the use of Village Funds to repave our public roads and as a mechanism to reconstruct and correct various aspects of the current roadway pavement for North Krueger Road. As part of this reconstruction, the design will replace the existing 22' wide roadway pavement and add 3' of paved shoulder on each side. The Village is proposing adding the 3' wide paved shoulder to protect the edge of pavement and to provide a "safe harbor" buffer for drivers and formalizing the shoulder by adding gravel and re-shaping the ditch lines. For reference, the proposed cross-section is very similar to that used by Lake County with the closest examples being Gilmer Road and Diamond Lake Road. The attached Invitation and Handout provide further details on the proposed project.

As part of the Village's efforts to solicit public input for these planned improvements, the Village will be hosting an informational public meeting at Woodlawn Middle School (6362 Gilmer Road) on Thursday, December 15, 2016 from 5:30 PM until 7:30 PM. Additional information on this project will be presented during the public informational meeting. Those interested are encouraged to attend this meeting to learn more about the project and to provide input. For those unable to attend the meeting, the materials will be posted to the Village's website following the meeting with public comment requested by December 31, 2016.

The Village will be distributing this information through regular mail and other available means but you are encouraged to please share this email and information with your friends and neighbors so that they are aware of the project and the opportunity to provide input.

Sincerely,

The Village of Long Grove

THE VILLAGE OF LONG GROVE

North Krueger Road Improvements

IL Rte 22 to Gilmer Road

Public Informational Meeting – December, 15 2016

PROJECT OVERVIEW

Due to the poor condition of the existing pavement, the Village of Long Grove requested and secured federal Surface Transportation Program (STP) funding for improvements to North Krueger Road between IL Rte 22 and Gilmer Road. This improvement will consist of a cost saving and effective rehabilitation technique which involves pulverizing the existing asphalt pavement, spreading and compacting it for use as a base and constructing a new pavement travel surface on top. Improved paved shoulders will be provided for the length of the corridor. Surface Transportation Program funds awarded by the Lake County Council of Mayors will cover 80% of the project's construction cost.

KEY PROJECT NOTES

- North Krueger Road will be rehabilitated for the entire project limits.
- Standard radii are proposed at all local street intersections throughout the corridor.
- A uniform 22-foot wide, two lane pavement section with 3-foot paved shoulders and 1-foot aggregate shoulders will be provided throughout the entire corridor.
- Minor profile adjustments will be made to improve sight lines.
- Construction will commence just north of Krueger Court to match the proposed reconstruction of N Krueger Road that will be constructed as part of the Future IDOT IL Rte 22 improvement project.
- Construction activities along the project corridor will require a detour route along Gilmer, IL Rte 83 and IL Rte 22. However local traffic access will be maintained for residents throughout the construction period.
- Retaining walls are proposed at two locations to minimize Right of Way and Tree Removal impacts while improving culvert drainage.
- Formal preparation of construction documents are expected to commence in 2017.
- Construction is currently planned to start in 2018.

THE VILLAGE OF
LONG GROVE

December 19, 2016

Dear Long Grove Residents,

Thank you for attending the North Krueger Road Open House that was held on December 15, 2016. Whether or not you attended the Open House, the Village wants your input on the plans to improve N. Krueger Road. The materials distributed prior to the Open House and the materials presented during the Open House are available for viewing on the Village's website under the Quick Link "N. Krueger Road Improvements - NEW" or by clicking on the following link: http://www.longgrove.net/events/n-krueger-road-open-house-12152016.

Total Project Cost = $1.6M

The Village has applied for Federal Funds that will pay for 80% ($1.28M) with the Village paying 20% ($320K) of the total project cost.

The "Public Comment Form" is attached and also posted under this Quicklink. In order to submit your comments on this important project, please print out the comment form and send to the Village prior to the December 31, 2016 deadline.

Email. dlothspeich@longgrove.net (Village Manager David Lothspeich)

Fax. 847-634-9408

Mail. Village of Long Grove, 3110 Old McHenry Road, Long Grove, IL 60047.

Sincerely,

The Village of Long Grove

Long Grove officials looking to rebuild North Krueger Road

By **Phil Rockrohr**
Pioneer Press

DECEMBER 19, 2016, 2:36 PM

Long Grove officials could decide by this time next year whether to use federal funds to help rebuild a deteriorating North Krueger Road following positive feedback from residents earlier this month, Village Manager David Lothspeich said.

The Long Grove Village Board likely will vote on the $1.9 million Krueger Road project next November or December and possibly receive bids for the project by early spring 2018, Lothspeich said.

Earlier in 2016, Long Grove applied for federal funds to cover the majority of the project costs because of the poor condition of the pavement on North Krueger, he said.

"We have some concerns about the existing road and construction there, and its effect on the useful life of the pavement and the condition of the pavement today," he said. "We patch our potholes as they open up, but the road has been fairly heavily patched over the course of years. It doesn't have a very nice aesthetic look."

Village officials recently presented plans to rebuild North Krueger from Route 22 to Gilmer Road during an informational meeting Dec. 15 that was open to residents.

About 12 residents attended the meeting, according to village officials. Residents also have until Dec. 31 to submit additional comments about the project.

All the materials presented at the informational meeting may be viewed on the village's website, Lothspeich said.

Four residents, whose property abuts the project, submitted letters expressing support for the proposal, which includes plans for federal funds to cover $1.5 million of the work, Lothspeich said.

The village would be responsible for $393,000 of the project, he said.

If Long Grove ultimately ditched the proposal and opted to repave the road again, the work likely would cost the village about $166,812 more, Lothspeich said. By using federal funds, village officials can reconstruct the road and add 4-foot shoulders on each side, he said.

During the informational meeting, residents also expressed concerns about how the work could affect the aesthetics along each side of the roadway, especially the southern third of the road, Lothspeich said.

Trees line that part of North Krueger Road in a heavily wooded area. Long Grove officials plan to take an inventory of the trees and determine whether the trees would be affected by construction, he said.

In addition to adding shoulders, ditches also may be built along each side of the road, Lothspeich said.

"We will have to evaluate that in terms of the impact on trees," he said. "There certainly are protected species from the village's perspective, certainly oaks. We will do everything we can to avoid those."

But the most common comment from residents during the meeting was the desire to improve the intersection of North Krueger and Route 22, an area where Long Grove has no authority over since the state owns it, Lothspeich said.

"Unfortunately, that project has been in the state's five-year plan for about 15 years," he said. "The good news is that (the Illinois Department of Transportation) has begun land acquisition for the project. We're hopeful that is a positive sign they will move forward in the next five years."

Regarding the village's plan to reconstruct North Krueger, local officials would have repaved the road a year sooner if they decided not to pursue a larger project with federal funding, said Village President Angie Underwood.

"That road had been deteriorating and had been on our schedule to be done," Underwood said. "It's important for connectivity and for our residents to get from place to place safely."

Phil Rockrohr is a freelance reporter for Pioneer Press.
