Hi David,

It was a pleasure to finally have a chance to speak to you this morning. As promised, attached are two plans: 1) the existing conditions of the reservoir and public access improvements 2) the preferred concept plan that both the MWRD and our Board has approved. The preferred concept shows where the proposed expansion will occur, the approximate location of the proposed natural landforms (material deposited from the reservoir expansion excavation) west of Schaeffer Road and the proposed public access improvements that will be constructed by MWRD as part of the overall expansion project. The reservoir expansion will provide an additional 171 acre-feet of storage volume and will occur entirely east of Schaeffer Road. The public access improvements will include: the relocation of approximately 0.5 miles of existing trail to a higher elevation, construction of a 1.4 mile trail loop around the existing east basin, construction of a 0.75 mile trail loop around the existing west basin, five boardwalks, two scenic overlooks and a 29 car expansion to the existing parking lot off of Checker Road.

As discussed, the District is currently working on the IGA with MWRD that will set forth the conditions on the project. We expect to take the IGA through both Boards in June or July. Once the IGA is executed, MWRD will move right into preliminary engineering which is expected to take 6 months. After completion of the preliminary engineering, they will spend 12 months in final engineering and permitting followed by 12 months of construction. That means the project will not be fully complete until the end of 2015.

I will keep you posted on any updates for both the reservoir expansion project and LCDOT's wetland mitigation bank project. Please let me know if you have any additional questions.

Thanks,
Randy
